MALONE, N. Y., possesses many attractions which appeal strongly to the visitor and the resident.

Its location, at a point where the southern slope of the St. Lawrence valley touches the foothills of the Adirondacks, is almost ideal. The picturesque mountain lakes in one direction, and the magnificent St. Lawrence River in another, are within easy reach. The town is a beautiful, progressive little city, whose inhabitants live in the enjoyment of urban comforts and Adirondack healthfulness.

The excellent schools, beautiful churches, magnificent system of water-works, model fire department and efficient police organization, attest to the enterprise of its citizens; while fine business structures and tasteful residences indicate their prosperity.

The object of this little book, however, is not to describe the attractions of Malone. This collection of Photographs is intended to be simply a souvenir for those who know Malone and love it, or for the visitor who has been charmed by the beauty of the town.

The limits of the volume make it impossible to present more than a few glimpses of Malone's scenery or architectural work and the aim of the publisher has been to make a representative selection.
